1. Open the hood.
2. Turn the ignition off!
3. Remove the ignition key!
4. Close and lock all doors!
5. Do not open any doors while installing the tuning kit!
6. Wait 5 minutes before beginning the installation

In order to avoid damages at electronic vehicle components, you have to be sure that you have done all necessary methods for electostatic discharge.

Install the electronic in a waterproof and vibrationless place. Do not make any changes at the tuning-kit!

Do not expand or shorten the loom.

Date: 14.03.2012
Overview:

The tuningkit has to be attached to the following points:

- Boost pressure sensor
- Intake manifold pressure sensor

Required tools:

- Screwdriver

Vorbereitung:

- Move the individual strands of the loom to the associated plug connectors
- Put the required tools by your side (if needed)
- Take the fastening material at your side
- *To get the maximum power enhancement, you have to use „super plus“ (98 ROZ)*
1. Preparation

◊ Before you could begin installing the tuning kit, you have to remove the engine cover.

◊ The engine cover is fixed with clips

2. Intake manifold pressure

◊ Disconnect the plug from the manifold air pressure sensor.

◊ Attach the manifold air pressure plug to the new loom

◊ Connect the plug of the new loom to the manifold air pressure sensor
3. Boost pressure

- The boost pressure sensor is located directly at the intercooler. To get to the boost pressure sensor, you have to remove the air filter box.
- Disconnect the plug of the air filter box.
- Loosen the clamp from the air filter box.
- Remove carefully the clipped cap of the air filter box.
- Remove the air filter.

- Remove carefully the battery cover to get more space for removing the air filter.
- The battery cover is only clipped.
◊ Now remove the hole air filter box
◊ Pay attention while removing the air tube from the air filter box

◊ Now grab from the position of the removed air filter box to the boost pressure sensor
◊ Disconnect the plug from the boost pressure sensor.
◊ Attach the boost pressure plug to the new loom
◊ Connect the plug of the new loom the boost pressure sensor
◊ For a better presentation the driver-side headlight has been loosen on this picture
4. Tuningbox

- Finally install the cable towards a suitable position
- The plugs must be engage, so that a safe connection is ensured
- Fix the cable with cable ties
- Connect the tuningbox to the new loom
